Nick

With regard to the above-referenced list, we request the following information:

(1) Information which specifies respective allocations of liability for each company listed. For example, information such as "Company X is currently a 2% contributor to remediation of Y site."

(2) Information reflecting the investigative and remedial costs incurred to date and/or an estimate of total clean-up expenses at each of the above-listed sites.

(3) A copy of any administrative consent orders or other documents reflecting settlement between EPA and the respective PRPs.

Pursuant to the Freedom of Information Act, EPA Region III must respond to this request within 10 days. As this is a relatively simple request, we would appreciate an expedited response to this correspondence. As time is of the essence, I could travel to your office and review the files if necessary.

We will gladly reimburse EPA for any expenses related to this request. If you have any questions, please contact the undersigned directly.

Sincerely,
LEVY, BIVONA & COHEN

Re: Freedom of Information Act Request 3RIN-1028-88

Dear Mr. DeGulis:

The following information and disposition are furnished concerning your request made under the Freedom of Information Act.

Date Request Received: 6/13/88.

Request Identification Number: 3-RIN-1028-88.

Cost: 0

- (X) Positive Determination (Material enclosed).
- () Your request of _____ modified as a result of a discussion with _____. (See remarks below).
- () Holding Material Pending Receipt of Payment (estimated cost over \$250 or arrangement for payment).
- (X) Fee Waiver. Less than \$25.00.
- () Processing Request: Partial information included. Remaining information to be forwarded by _____.
- () Processing Request: Extension until _____ needed due to _____.
- () Please make check payable to U.S. Environmental Protection Agency. Put Request Identification Number (RIN) on check and mail to EPA-Region 3, P.O. Box 360515M, Pittsburgh, PA 15251.

Remarks: This request has been fulfilled.

Sincerely,

Gregg Crystall

Re: Freedom of Information Act Request 3RIN-1028-88
Blosenski Landfill Site

Dear Mr. DeGulis:

This letter supplements the Freedom of Information Act response form with regard to the above-referenced site. The status of the case information which you have requested is as follows.

(1) Information which specifies respective allocations of liability for each company listed - A Potentially Responsible Party Search was undertaken by EPA for the Blosenski Landfill Site, and is currently being expanded upon by supplemental follow-up efforts. The amount and type of information which has been gathered as a result of EPA's efforts does not and will not enable EPA to allocate liability or responsibility to specific parties involved in this case.

(2) Information reflecting the investigative and remedial costs incurred to date and/or an estimate of total clean-up costs - Enclosed is a cost summary which provides information on the site expenses up through the Remedial Investigation and Feasibility Study at the Blosenski site. At present, the site is in the Remedial Design phase with EPA's Superfund program. A projection for the design and implementation costs for the site can be found on page 38 of the Record of Decision for the Blosenski site. A copy of this page is enclosed for your reference.

(3) A copy of any administrative consent orders or other documents reflecting settlement - No such settlement documents exist for the Blosenski Landfill site.

The above information should fulfill your request made under the Freedom of Information Act for the Blosenski Landfill Site. If you should have any questions, or require additional information, please contact Ms. Donna McCartney at (215) 597-1101 or Mr. Jeff Winegar at (215) 597-1265. Thank you.

Sincerely,

Gregg Crystall

- 5) Installation of a low permeability cover on the landfill in accordance with requirements of RCRA. During the trenching and excavation operations on the landfill, additional soil samples will be collected and analyzed to assist in the design of an on site RCRA cover. The soil analysis will also be used for the evaluation of the need for development of 10^{-6} unit cancer risk criteria for target compounds remaining in the soil. The cover design may be reevaluated based on additional data to provide the necessary environmental protection that meets CERCLA goals and which may be more cost effective, than the cap in Alternative Three. The cost estimates in this ROD are for a RCRA cover detailed in Alternative Three.
- 6) Institute periodic monitoring for ground water and surface water contamination in the landfill area in compliance with RCRA closure regulations. This will include sampling of potentially affected residential wells in addition to surface water sampling.
- 7) Operation and Maintenance (O&M) will be implemented by the State of Pennsylvania on the landfill cap, gas venting, surface diversion system and monitoring program one year after construction of these systems. The ground water treatment system will be eligible for trust fund monies.

Costs

Design Cost

Additional sampling, monitoring wells, and pump testing (pre-design) has been costed as part of the design. Design is estimated to cost approximately \$1,000,000. The pre-design study is estimated to cost \$200,000. The pre-design and design costs will be funded 100% by Trust Fund monies.

Capital Cost

Capital cost estimates range from \$11,000,000 to \$15,000,000 with an estimated baseline of \$13,000,000. For these estimates, capital costs included all costs associated with excavation, regrading, revegetation, capping, installation of the gas venting treatment system, and ground water pumping and treatment. Cost estimates for pumping and treatment were based on a five year operational period. Trust fund monies will be used to pay for 90% of these costs and the State of Pennsylvania will finance 10% of these costs.
